How to use Momentum Timer Pro™

The "-S|+B" are the consecutive number of daily Sell (-) or Buy (+) counts. There is a rolling 10-day window of Buy and Sell signals for the past 10 days. The 1-, 3-, and 6-Month signals show a Buy signal when the net number of daily Buy counts turns positive within each respective window size. Next to each window size is a position sizing guide, which is not personal investment advice, that will recommend a "Min", "Mid", or "Max" position size relative to your maximum position size. A Sell signal will show a position size of "None". A directional arrow will display to the right of each position size only on days the position size changes to indicate which direction the position size changed to.

The signals provided by Momentum Timer Pro™ should not be used on their own to make investment decisions but to supplement your own research before placing a trade.
